

B3

B3Encyclopedia for Self-Sufficient Homes:

A Complete Reference Book for New Self-Sufficient Homes.

This massive reference book includes similar content to "Planet Earth Home" but with a more generic approach. It describes an ideal self-sufficient home and all the functions that need to be addressed in the design. It has a huge yellow page section with sources of information and products. There are reduced drawings, charts, and graphs to illustrate specific points of interest. Also includes underlining of important concepts, technologies, and ideas to allow speed reading or scanning. This book has just been updated for 2007. ISBN 978-0-9673711-1-2, acid-free paper, 750 pages \$140 plus \$8 shipping. (See also related books, pamphlets, CDs, and DVD)
